CHINA PROJECTION REPORT

The RCR *China Projection Report's* detailed discussion, statistics and graphs review China's 1980-85 economic trends and extend them into the future. RCR's comprehensive 11-sector input-output model combines historical data through mid-1985 with expert opinion on annual prospects through 1990 and five-year prospects through the 2005. Sources, assumptions and alternative scenarios are thoroughly discussed.

Here are only a few of the sectors and topics covered:

- Fuels and Fuel Balances
- Processed Foods
- Consumer Manufactures
- Producers' Machinery
- Service Industries
- Crop Value Yields
- Planted Area
- Current Account Balances
- Foreign Debt
- Urban and Rural Populations
- GDP and NMP Aggregates
- Gross Output
- Heavy and Light Industry
- Commodity Exports and Imports
- Investment
- Urban and Rural Consumption
- Grain and Grain Balances
- Non-grain Foods
- Industrial Crops

Order your copy of the RCR *China Projection Report* today, or send for more detailed information using the convenient form below.

RCR resources and on-going coverage ensure analysis with the most recent trends and details.

CHINA ECONOMY SEMINAR

On April 3-4 in Washington, DC, meet with Dwight Perkins (Harvard), Doak Barnett (SAIS), Michel Oksenberg (Michigan), Kenneth Lieberthal (Michigan), Harry Harding (Brookings), Fred Surls (USDA) and others to review China's 1985 economic record and RCR's draft projections for 1986 and beyond.

The Rock Creek Research Professionals

Rock Creek Research's staff of professional American economists speak and read Mandarin Chinese fluently. Working under the direction of Albert Keidel, Ph.D., each has strong research and statistical experience in one or more major sectors of China's economy.

Dwight H. Perkins is Senior Economic Adviser to Rock Creek Research.

Dr. Perkins is Professor of Economics and Modern Chinese Studies at Harvard University and Director of the Harvard Institute for International Development.
